NIVORA

THE RENTAL LIVING ECOSYSTEM

Your next chapter starts at home.

THE PROBLEM

Renting a home shouldn’t feel like solving a puzzle

Finding a home is only the beginning. Renters often piece together information, checks and conversations across separate channels.

Search	Options are spread across portals, brokers, groups and word of mouth
Compare	Location, budget and fit are judged from details that don’t line up
Verify	It’s hard to tell what, if anything, has actually been checked
Coordinate	Calls, visits and follow-ups run through different channels
Move	Agreement, deposit and move-in are handled separately again

WHY IT MATTERS

2.17 crore

urban households lived in rented homes

India · Census 2011

71%

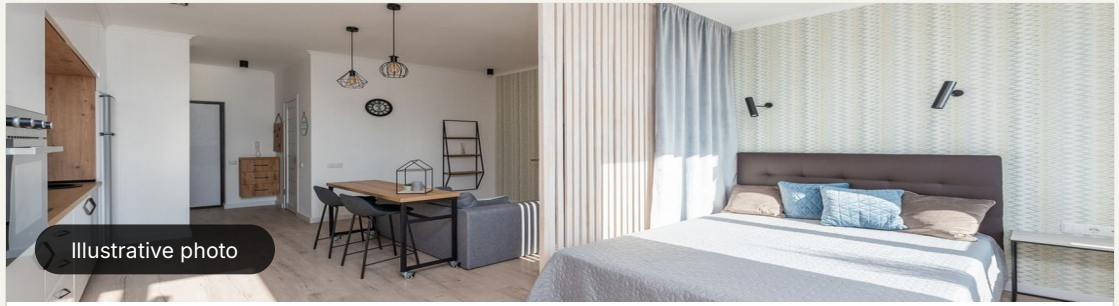

of renting households had no written rental agreement

India · NSSO data

Both figures as cited in Knight Frank & Khaitan & Co., “Institutionalising the Rental Housing Market in India” (2019). National figures, not Jaipur-specific.

WHO WE SERVE FIRST

Built around the people who need a place to belong

Students

Looking for a room or flat near a college or university, balancing distance, budget, room type and everyday convenience.

SEARCH ANCHOR · CAMPUS

Working professionals

Looking for a home within practical reach of the workplace, balancing location, budget and living requirements.

SEARCH ANCHOR · WORKPLACE

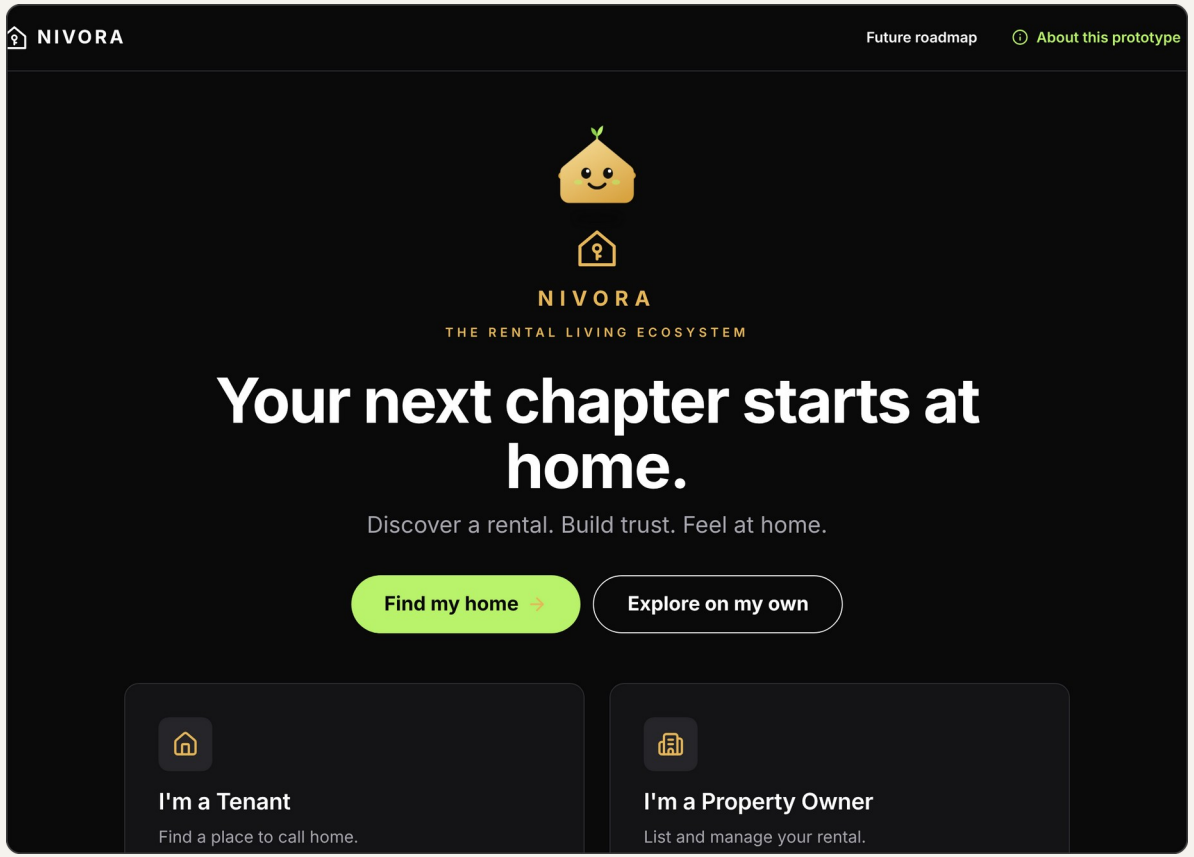

SHARED NEEDS

- Location fit
- Budget fit
- Suitable living preferences
- Confidence in the listing

Proposed starting point: focused rental discovery around selected Jaipur college and office clusters. A launch strategy to test, not a proven demand result.

THE SOLUTION

One connected experience for the rental journey

Actual prototype interface: the welcome screen

DISCOVER

Explore rentals around a college, workplace or area, by radius, budget and preferences.

IN PROTOTYPE · DEMO HOMES

MAKE INFORMED CHOICES

See listing details and four separate trust checks, so it's clear what has and hasn't been checked.

IN PROTOTYPE · DEMO LABELS

CONNECT THE JOURNEY

Tenant and owner already share visit requests. Agreements and payments come only once built.

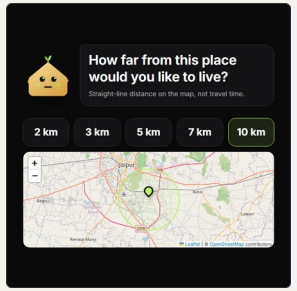

PARTLY IN PROTOTYPE · REST PLANNED

Being built beyond a directory of listings, toward a connected rental-living experience.

THE PRODUCT

A more guided way to find your next home

01

Meet Nivi

A guide that asks one question at a time

02

Choose a place and a radius

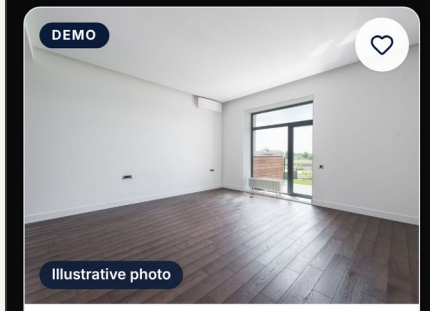

A college or office, then 2–10 km straight-line

03

Share preferences

Furnishing, budget, home type, rooms, must-haves

Demo homes with simulated map positions. "Verified (demo)" is a label on demo data, not a real check.

₹16,500 / month

Builder Floor 2 BHK, Jagatpura

Builder Floor · Jagatpura

2 BHK · 2 bath · Unfurnished

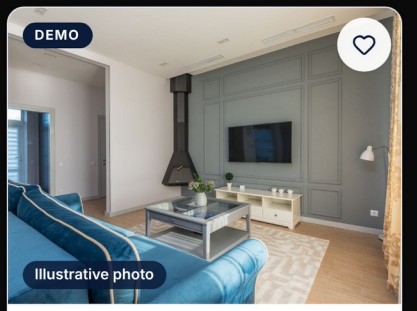

≈ 1.5 km straight-line from VGU · simulated position

Parking · 24h water

Available now

4 of 4 checks verified (demo)

View details

₹19,000 / month

Office-Ready 2 BHK, Sitapura

Apartment · Sitapura

2 BHK · 2 bath · Semi-furnished

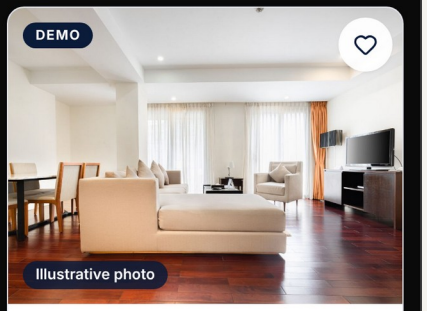

≈ 5.6 km straight-line from VGU · simulated position

Wi-Fi · Power backup · Parking

Available now

1 of 4 checks verified (demo)

View details

₹22,000 / month

Sunlit 2 BHK, Malviya Nagar

Apartment · Malviya Nagar

2 BHK · 2 bath · Semi-furnished

≈ 9.0 km straight-line from VGU · simulated position

Parking · Lift · Wi-Fi · +1

Available now

4 of 4 checks verified (demo)

View details

04 Explore matching homes, then open one to review it

PROTOTYPE DEMO · ILLUSTRATIVE LISTINGS · SIMULATED POSITIONS

TRUST & DIFFERENTIATION

More than listings. A trust-aware rental experience

LOCATION-RELEVANT DISCOVERY

Search around a meaningful destination, such as a college or workplace, with a radius and personal preferences.

IN PROTOTYPE · ONE TEST DESTINATION

TRUST-CENTRED DESIGN

Four separate checks (owner identity, authority to list, listing accuracy, availability) instead of one vague badge.

DEMO IN PROTOTYPE · REAL CHECKS PLANNED

A CONNECTED RENTAL JOURNEY

Discovery, visit requests and owner follow-up in one shared flow, extended only as later stages become real.

PARTLY IN PROTOTYPE · LIFECYCLE PLANNED

Prototype screen: four separate checks, labelled (demo). Nothing is really verified.

WHAT A REAL CHECK WOULD REQUIRE

Defined procedures · supporting evidence · transparency for renters · clear ownership of the process

BUSINESS MODEL · PROPOSED

Creating value for both sides of the rental market

Tenants

Relevant homes near the places that matter, clearer information and a guided search

NIVORA

connects both sides

Property owners

Suitable enquiries, organised listings and visit requests in one place

REVENUE STREAM 1

Transaction-linked fee

A clearly disclosed fee tied to a completed rental, only if it proves legally appropriate and workable in practice.

REVENUE STREAM 2

Optional owner tools

Paid conveniences such as listing management or rent and maintenance tracking, only where owners see real value.

Validate before pricing: willingness to pay · unit economics · acquisition cost · cost of delivering verification. No prices or revenue are claimed.

MARKET & GO-TO-MARKET

Start focused. Validate locally. Expand with evidence

NATIONAL CONTEXT

2.17 crore

urban households rented their home

Census 2011, via Knight Frank & Khaitan & Co. (2019)

4.33 crore

students enrolled in higher education

AISHE 2021-22, Ministry of Education (2024)

Context only, not NIVORA's addressable market. Figures differ in year and measure.

PHASE 1

Focused Jaipur pilot

- Pick a few college or office clusters
- Onboard real owners and legitimate listings
- Test whether location-led search helps

PHASE 2

Validation

- Gather tenant and owner feedback
- Measure relevance, enquiries and verification pass rate
- Report only real pilot results

PHASE 3

Controlled expansion

- Add localities or clusters one at a time
- Only with evidence of demand, listing quality and sustainable acquisition

HOW WE WILL SIZE JAIPUR

Map the chosen clusters → estimate renting students and professionals nearby → count listings we can genuinely onboard → measure reach during the pilot

EXECUTION & ROADMAP

From a working prototype to a validated rental platform

TODAY

Working prototype

Brand intro · guided onboarding with Nivi · radius search around a test destination · demo listings with itemised (demo) checks · tenant and owner views sharing visit requests · 520 automated tests passing

STAGE 1 · NEXT

Product & user validation

- Refine the core tenant experience
- Interview renters and property owners
- Agree measurable pilot success criteria

STAGE 2

Trust & operational foundation

- Real owner and property verification procedures
- Production backend, privacy and data handling
- Support, dispute and legal groundwork

STAGE 3

Controlled pilot & iteration

- Onboard genuine listings
- Run a limited pilot and gather feedback
- Measure outcomes, improve, then expand

PROPOSED PILOT METRICS · TO BE MEASURED, NO TARGETS SET

Time to find suitable options | Genuine enquiry rate | Verification completion rate | Tenant and owner satisfaction | Completed rental journeys

Your next chapter starts at home.

A more connected, considerate way to navigate rental living.
